Attachment to Advisory Action

Applicants' amendment filed 3/31/2006 has been considered; however, the amendment

has not been entered given that it raises other new issues that would require further consideration

and/or search.

With respect to other new issues, claims 1 and 7 have been amended to further limit the

polymer, wherein the polymer is made of a mixture of polymer particles and those particles are

further described in new claims 11-21. It is the examiner's position that this is a new issue since

a mixture of polymer particles was not heretofore examined and would therefore require further

consider and/or search. Furthermore, new claims 12 and 18 would be subject to a 35 USC

112(2) rejection since it is not made clear if the first polymer phase can contain crosslinking

groups other than acetoacetoxy and cyanoacetoxy groups. If all crosslinking groups are

excluded, claims and 12 and 18 would be broader in scope than the independent claims since the

independent claims require the polymer (which includes both phases) to have a crosslinking

group.

In the interest of better enabling the applicants to assess the patentability of their claims,

the following advisory.

Applicant argues that Bors et al does not disclose first and second polymer phases with

specific weight percentages.

In response, applicant's attention is drawn to examples 21, 22, and 23 where mixtures

and core-shell polymers are disclosed. Example 22 discloses a 50/50 (w/w) mixture.
